Arizona, 85392, United States | Mexico

Senior Software Engineer with 15+ years of experience implementing and delivering software solutions in the healthcare, fintech, and other fields. Lately focused on Node.js, and some AWS services. Experience during my career working with Java, building distributed data pipelines, microservices, and CI/CD automation; proven success working remotely among a distributed internationally agile teams. During my career, I've used multiple technologies, with varying levels of proficiency, which I list next.

**Programming Languages:** Java, JavaScript (Node.js), TypeScript, SQL

**Frameworks:** Spring Boot, Express.js, Apache Camel, Hibernate

**Cloud & DevOps:** AWS (ECS, S3, Lambda, CloudFormation), Docker, Jenkins, Kafka

**Databases:** PostgreSQL, SQL Server, Oracle, MySQL

**Methodologies:** Agile/Scrum, CI/CD, Microservices, Event-Driven Architecture

## PROFESSIONAL EXPERIENCE

**Foundation Medicine** | <https://www.foundationmedicine.com/>  
*Software Engineer* | Full remote Phoenix, Arizona, United States  
*Industry: Healthcare*

May 2022 - Present

- Implementation of enterprise-scale report delivery platform on AWS using Node.js, Kafka, and Docker. I play part on the team that worked to re-architect and migrate the whole report delivery platform from a Java, ActiveMq and others stack to Node.js, Kafka, AWS, which notably improved the efficiency for deployments and development, also allowed for a more flexible, scalable and customizable reporting infrastructure, it reduced the report generation error fixing from days to minutes, the customer support became more prompt and easy.
- Collaborate with cross-functional teams to enhance platform observability and CI/CD automation (Logz.io, Jenkins, SonarQube).

**Unosquare** | <https://www.unosquare.com/>  
*Java Software Engineer* | Remote Consultant Guadalajara Area, Mexico  
*Client: Foundation Medicine*  
*Industry: Healthcare*

Sep 2019 - May 2022

- Developed data-integration pipelines for oncology healthcare reporting using Java, Spring Boot, and AWS.
- Implemented messaging patterns with Apache Camel and ActiveMQ to support distributed microservices.
- Participated in Agile ceremonies, contributing to system scalability and data reliability improvements.

**Softtek** | <https://www.softtek.com/>  
*Java Software Engineer* | Consultant Aguascalientes Area, Mexico / St. Petersburg FL. USA.  
*Clients: Kobie Marketing, Maritz Rewards*  
*Industry: Loyalty Management Platform Provider*

Aug 2016 - Sep 2019

- I worked in a couple of projects related to the rewards management area. In these projects, primarily involved with technologies, APIs and frameworks like, JAX-WS, SOAP web services, JMS, JAXB, EJB, hibernate, PostgreSQL, SQL server, Apache Camel, Spring-boot, spring batch, liquibase.

- The activities I had for the first project (Kobie) where mainly Java software engineer, I joined a team that took care of the rewards system of the company to offer customer support, solve issues, maintain and add new features.
- Then, I joined a team where several development and support teams were taking care of the client systems and I performed as a flexible engineer where I acted as a developer, scrum master, support as needed.

**Tata Consultancy Services** | <https://www.tcs.com/>

- I established my own business to offer internet browsing services, computers and accessories selling etc..

## **Earlier Experience (2002–2008)**

I worked in the roles of Developer, IT Coordinator, Freelancer, Help Desk, Web developer for commercial sites.

## **EDUCATION & CERTIFICATIONS**

**Bachelor in informatics** – Instituto Tecnológico de Aguascalientes

**Technical Computer Programmer** – Centro de Bachillerato Tecnológico Industrial y de Servicios # 168

**Oracle Certified Java Programmer (Java 6)** – Oracle, Dec. 2010

**AWS Certification recommended:** Developer (in progress)

## **LANGUAGES**

**English:** Professional working proficiency

**Spanish:** Native

## **SELECTED ACHIEVEMENTS**

### **Integration Platform – Foundation Medicine**

- I re-wrote most of the existing code that does the work to copy files from an AWS S3 source from basic javascript and old AWS SDK to a newer version of Javascript AWS SDK, including making it more generic for easy integration with other code modules.
- I collaborated with layout of the new architecture, and re-implementation of an already existing Java-based system.

### **Rewards Software – Maritz / Kobie Marketing**

- Supported development and maintenance of loyalty systems for major U.S. retail brands.
- Built backend modules and provided training and code reviews for new teams.

## **STRENGTHS**

- Analytical Problem Solving: Adept at debugging and optimizing large-scale distributed systems.
- Continuous Learning: Self-taught across multiple stacks (Java → Node.js → AWS → DevOps).
- Adaptability: Thrives in remote, multicultural, and agile environments.
- Technical Writing: Clear communicator, capable of documenting and presenting technical concepts to non-technical stakeholders.
